
11th bass-string not long enough

Posted by EinarF - 2017/11/14 18:01

I used the bass-string-set from Hannabach, but now it seem to be out of sale. Then I tried to use the 6th string from Luthier as the 11th string, but it was not long enough. What kind of string can I use?

D'Addario Pro-Art strings are long enough. J43, J45, J46.

I have never used Hannabach basses, but I will bet that you can still find them at Strings by Mail. Check out this link
